Table 8: Member Survey

[NAME OF ASSOCIATION] MEMBER SURVEY

for purposes of application for a Professional Standards scheme under Professional Standards Legislation

The [association] is currently preparing an application to the [state\territory] Professional Standards Council for a Professional Standards Scheme under Professional Standards Legislation. A part of this process includes applying for caps or limits of indemnity that would be considered by the [state\territory] Professional Standards Council to provide reasonable levels of protection for consumers of our services.

Before approving a scheme, the Professional Standards Council[s] must consider the nature and level of claims relating to occupational liability made against members of a professional association, in order to assess the reasonableness of the proposed caps. As future risks are considered on the basis of historical information, the Professional Standards Council collates insurance claims data over a 10-year period.

This survey is necessary to collect the information required by the Professional Standards Council to consider the [association's] application for a scheme.

Given the importance of obtaining accurate information to support applications for legislated caps, it is imperative that members complete this survey. A low response rate will have limited use and may result in the Professional Standards Council being unable to consider our application.

Once the capped liability scheme is established, the maintenance provisions of the scheme will require compulsory reporting of all future notifications and claims on an annual basis.

Please complete the tables provided, to the extent possible, and use additional space where necessary to complete questions. Answers to all questions must be clear and concise. Information returned must not be deceptive and/or misleading.

Please note that claims information provided to the Professional Standards Councils will be anonymised

Completed surveys are to be returned to [the association] in the attached self-addressed envelope by [date].
